

BRICK ACADEMY'S INTENSIVE ARCHVIZ 3D ARTIST COURSE INFO

Your Guide to becoming an archviz pro

Sept 2019

WELCOME

TO BRICK ACADEMY'S
COURSE INFO

In this document we collected everything you need and need to know about learning at Brick Academy's Intensive Archviz 3D Artist Course.

Although it's quite lengthy, this PDF covers everything to help you. Please find here the details of the study plan and the exam, your first steps in becoming an archviz professional.

Terms and conditions are detailed in your training contract that you will receive, if you book a seat.

PROGRAM

WHAT YOU WILL LEARN
DURING THE COURSE

Wether Brick Academy is your first step in archviz or you already have some experience, our Intensive Course is for you.

Thanks to our personalized education system, we can guarantee that you won't feel left behind, nor get bored. You are on your way to become a professional 3D artist.

This chapter of the course info will guide you through the program your whole month dedicated to architectural visualization and learning.

You will have workshops and mentoring.
What are those?

Workshops are basically for listening, learning and going through tutorials together. You will have presentations and demonstrations that you will try in practice at the mentor days.

Mentoring: at Brick Academy, you will always have someone to ask for advice. Unlike in any other 3D courses, four mentors will help you to acquire knowledge and necessary skills. On the mentor days, you will practice what you heard before with the constant guidance and assistance of our mentors.

Here you can find your schedule for workshop and mentor days.

DAY 01

INTRODUCTION

PRESENTATIONS

- What is archviz? An introduction to architectural visualization.
 - The fundamentals of 3Ds Max in archviz
-

WORKSHOP

- Tips and tricks for imported models, layouts and more (ways of importing models from other 3D software)
- General modeling and modifiers, spline and polygonal modeling - A brief insight into architectural modelling techniques used in archviz

SEPT 2

DAY 02

COMPOSITION, LIGHTS AND REFERENCES

PRESENTATION

- The art of good composition and its importance - showcasing best-practice examples based on their roots in cinematography and fine art/ based on their cinematographic and fine-art inspiration.
- How to find and pick the best references - an essential to archviz image creation.

WORKSHOP

- Instruction to V-ray and physical camera settings and terminology and their relation to each other.
- Light setups - How to light a scene using V-ray Sun and V-raySky and HDRi. This lesson gives you an insight to the different kinds of lighting, as global, local lights and atmospheric effects.

SEPT 3

DAY 03-04

MENTORING DAYS

Following the first workshop days, you will have two days of mentor assisted sessions to practice what you have learnt focusing especially on composition and lighting.

At the end of the first mentor days, you'll be already able to create clay renders.

As the closing of the first chapter, you will prepare 4 clay renders to continue the course.

Please note: our mentors will constantly assist you, so please don't hesitate to ask them, they are there to help your professional development.

SEPT 4, 5

DAY 05

SHADING, SETTINGS & RENDER ELEMENTS

WORKSHOP

- Introducing V-Ray Standard Material
 - Basic architectural shaders - you will learn to create the basic architectural materials, using V-Ray Standard Material
-

SEPT 6

DAY 06

HOW TO DRAFT

WORKSHOP

- Fundamentals of Adobe Photoshop - Structuring a Photoshop file, using render elements and masks.
- How to create drafts - an introduction to design an archviz draft for a fictive project using your already acquired knowledge, searching for references, setting cameras, lights and materials.

SEPT 9

DAY 07-09

WORKSHOP - HOW TO DRAFT

- Fundamentals of Adobe Photoshop - Structuring a Photoshop file, using render elements and masks.
- How to create drafts - an introduction to design an archviz draft for a fictive project using your already acquired knowledge, searching for references, setting cameras, lights and materials.

MENTORING DAYS

Using the top 2-3 of clay renders that you have created before, you will practice the skills, you have been taught in the last workshop sessions, concentrating on drafts.

As they are key elements in creating archviz images and have a prominent role in the workflows of Brick Visual, mastering drafting is an essential in your skillset as a 3D artist.

Remember, our mentors will be always ready to give you valuable feedback.

SEPT 10-12

DAY 10

CREATING COMPLEX SHADINGS, TEXTURES & MATERIALS

WORKSHOP

- Shading - a guide to advanced and more complex shading, AKA: multi-level shading
- Get to know textures and create them
- Insight on optimizing materials - how more complex materials are structured and how to use and optimize them

SEPT 13

DAY 11

ADDING IMPRESSIVE ENVIRONMENTS & OBJECTS I.

- Useful scripts
- Creation of VrayProxies
- Environments - what are they and how you can create them
- Modelling landscapes

SEPT 16

DAY 12-13

ADDING IMPRESSIVE ENVIRONMENTS & OBJECTS II.

WORKSHOP

- You will learn how to create realistic and beautiful vegetation using forest packs.
- An introduction to Railclone, a highly useful plugin to 3DsMax that lets you create objects, manipulating previously created models.

MENTORING DAYS

As before, you will practice what you have heard before and continue your projects with the help of your mentors.

Based on your previous workshop session creating materials, details and preparing scenes will be your main tasks to master.

SEPT 17-18

DAY 14

ADDING BUZZ - CHARACTERS AND POST-PRODUCTION I.

PRESENTATION

- The art of story telling - how to create images that really resonates with the viewer

WORKSHOP

- You will be using Brick Visual's lights and greenbox to create original characters that will give life to your images.
- How to place characters - some rules that will help you to position your characters.

SEPT 19

DAY 15

ADDING BUZZ - CHARACTERS AND POST-PRODUCTION II.

WORKSHOP

- Finalise the image with post-production creation tools with following a reference, using colour and contrast adjustments, placing matte elements, and apply photo filters.

SEPT 20

DAY 16-20

MENTORING DAYS

Until the last mentor sessions, you have heard everything that you need to know to start creating industry-standard images on your own and to put together a powerful, professional portfolio of 3-4 polished archviz projects.

In this 5 days, your only task will be to practice, practice and practice, while deepening the knowledge under the conscious assistant of our mentors.

This is your time to really create effectively, without any limitation and with unlimited help.

SEPT 23-27

STEPS

TO BE A JUNIOR 3D ARTIST
AT BRICK VISUAL

START

1. BOOK A SEAT

With a simple registration you can reserve a seat at our Intensive Archviz 3D Artist Course. The registration form will require your portfolio.

Please don't get discouraged, we don't need a well-polished portfolio, anything will do that shows us that you have strong interest in visual arts. It can be drawings, photographs, anything visual in any digital format.

Your portfolio will show us if this course is for you, saving you time and money. It also helps us to personalize your education to make it as effective as possible.

2. SECURE YOUR SEAT

After the registration you will be sent a payment request and a Training Contract. Take your time to read it, you have 3 working days after receiving the documents to decide.

Send back the scanned Training Contract signed via email to academy@brickvisual.com and transfer the tuition fee to our bank account in 7 days after receiving the documents.

3. SEAT SECURED

Your seat now is secured and you are officially a Brick Academist.

Note: Brick Visual has the right to delete a course, if less than 7 students register. Naturally, you will get your tuition fee back and a 10% discount from our next course.

4. BE PRESENT

Participate at least 80% of the courses. In order to get the Brick Visual and the VRay certificate, you should be able to invest your work and time and be present.

The whole Intensive Archviz 3D Artist course is 160 hours, so you need to appear at least 128 hours to be eligible for the certificates.

The certificates, your expertise and your portfolio of 4-6 professional images will definitely boost your career in architectural visualization.

If you don't want to join our team, it's time to say farewell and celebrate your exam and have a drink together.

THANK YOU VERY MUCH FOR LEARNING WITH US!

**PLEASE KEEP READING
IF YOU WANT TO JOIN
BRICK VISUAL**

5. TAKE THE EXAM

After the course, if you'd like to work with us, you have to take the final exam. You will demonstrate your skills you have learnt during the course, in three exercises.

6. HIRED BY US?

Based on your exam and portfolio, *Brick Visual may offer you a full time, salaried position* in our Budapest or in the Cluj Napoca offices.

Note: Brick Visual has the right to not offer a position even if you chose to participate in the exam.

7. WILL YOU JOIN?

If you *passed the exam and you accept our offer*, further trainings may await you to boost your professional development. You will be part of a great and inspiring team, creating architectural visualizations for remarkable architect studios.

NAILED IT

The sky 's the limit, you have became an Archviz Wizard.

Welcome aboard at Brick Visual!

FAQ

EVERYTHING YOU NEED
TO KNOW

Is there an online version of the course? Can I share the content of the course?

No, and we are kindly asking you not to share your learning materials and example files, given by Brick Visual.

Should I travel to Budapest, Hungary to enroll in the course?

Yes, part of your final exam will be based on your presence, in return, you will be offered constant help from our mentors.

Please consider if you can spend 4 weeks in Hungary, as this is a full-time course. We will give you advice on finding accommodation.

If you are outside of the EU, you will need a VISA and you should be eligible to travel to Hungary. (We can help you to provide information regarding Visa, but all academists must organize their trip and paperwork themselves.)

What is the cost of living in Budapest?

Depending on your preferences and needs, a month of comfortable living in Hungary is somewhere between 700 and 1000 Euros with accommodation, food and travel.

The office is in the 3rd district, so the best is to search nearby! We recommend Airbnb for the best options.

Does the tuition fee include VAT?

If your tuition fee will be covered by a company, you have to pay VAT, which is 27% in Hungary and it can be reclaimed. ***As an individual, the VAT does not apply to you.***

Should I have to have prior art/ architectural or 3D studies?

No, not at all, you should only have a strong interest in visual arts. But you will need:

- Basic 3Ds Max Skills (If you have archviz experience, but you need a boost, you won't be bored either)
- Good eyes for visual creations
- You must be over 18 years old
- Some examples of your work - any kind of visual materials from photography, drawings, videos, etc.. (It won't be a deal-breaker in your enrollment, it only helps us to develop your personalized learning).

Is this course made for complete beginners?

Based on our earlier experience, we know that this course is not just for juniors. From the first lesson we will have a strong focus on important artistic tools, such as composition, lighting and story.

So someone may have years of experience as a 3D artist, yet still lacks the skills and understanding of what makes a high-end image engaging.

As 4 mentors will handle maximum 12 people, will have enough energy to tailor-made the course for you concentrating on your needs as an artist.

Can I share my work in progress and final images, created at Brick Academy's courses?

Definitely yes! Please proudly share your work and portfolio, you have earned them. If you can, please tag or indicate that the images were the outcome of the Brick Academy course.

What if i want to use Corona instead of V-Ray?

The course can be tailor-made and we will help you in Corona as well, as our mentors/teachers are experts in both engines. Please note that there will be some occasions during the workshops when we will focus only on V-Ray. We believe it is required to know both engines for a 3D artist so it is not a waste of energy for you to get to know V-Ray as well.

Please note: if you only use Corona, you can't get the V-Ray Certificate.

Where can I find images from previous Brick Academy courses?

See this [link](#) for some samples (some of them are based on reference photos or renders) from our students. These images were made on a similar, yet longer course as the Intensive Archviz.

Some of the featured students currently are working as senior artists at Brick Visual.

What If I can't make it to the course?

You will get a full refund, if you cancel your booking 60 days PRIOR to the start of the course, 75%, if 60-30 days PRIOR the course, 50% if 30-10 days. Please note, we can't refund you if you cancel your booking less than 10 days prior the start.

In case of major incidents, such as accidents or illness, visa issues, please contact us!

If you wish to cancel, please write to: academy@brickvisual.com

Does my course can get cancelled or postponed?

Yes, Brick Visual has the right to cancel or postpone the course 5 working days prior to the start of the course. In this case, we will inform you and you will have a full refund and a 10% discount from the next course.

Am I guaranteed to be offered a position by Brick Visual after finishing my exam?

No, please note, that successfully doing your exam doesn't mean to automatically get hired by Brick Visual.

If you need any help or have questions, please contact us, we are happy to help.

Write an e-mail to Hajni, our coordinator at academy@brickvisual.com

Book your seat and start your archviz education at Brick Academy!

Hope to see you soon,
The Brick Academy Team

2019 July 18.
